2. Citations and explanations (Rule 70.7)

Claim 1

Claim 1 meets the requirements of novelty, inventive step and industrial applicability of PCT Article 33(2) to 33(4).

Since no single citation in the international search report or the description mentions all the features of independent claim 1, the subject matter of said claim is novel.

The invention is based on the prior art as described in W003/031075. It relates to a powder dispensing nozzle for an electrostatic powder coating device intended to be positioned at the end of a powder coating gun, which nozzle includes a side wall defining a passage extending the powder tube of the gun, and an end wall closing the tube at the end thereof.

The subject matter according to the invention differs from this prior art in that at least one port (57) connecting the powder tube (8) to the outside of the nozzle (2) is provided in the side wall (49) near the end wall (56) such that the axis (A1) of the port (57) forms a predetermined angle (A) with the axis (A2) of the powder tube (8), and in that at

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

least one deflector (58) is provided on the nozzle end wall (56) or on the side wall (49) near the nozzle end wall (56) for deflecting the jet of powder from the tube (8) along the axis (A1) of the port (57).

The particular construction of each component of the device is neither known from the prior art cited in the international search report nor considered by a person skilled in the art to be an obvious or routine selection.

Claims 2 to 16

Claims 2 to 16 relate to particular embodiments of the subject matter described in claim 1, and thus also meet the requirements of PCT Article 33(2) to (4).

Additional observations

Contrary to the requirement of PCT Rule 5.1(a) (ii), the relevant prior art disclosed in document WO03/031075 has not been indicated in the description.
